

Minimalistic Beamer Demo

Designed by Ariana

Your Institute

June 2025

Section title will be shown in one single slide, with light pink background

Subsection title will also be shown in one single
slide

Frame Title

This is an example of a typical `frame` in the slides. Most useful commands are:

- `\vspace{1em}` command can insert white space between lines.
- `\begin{itemize/enumerate}` command can set bullet point list.
- For every section title, a shorter abbreviation of the full title can be set using:

```
\section[short title]{full title},
```

In the navigator at the top of every page, the shorter title will be shown.

Design

Palette & Typography

- ① Light-beige canvas (no hard white glare).
- ② Black and deep-grey text.
- ③ **Pink accent** and **boldfaces** and *italics*, or **combined** for attention.
- ④ Single typeface: **Poppins** varieties for every weight.

Special Design Remarks

`ariana.sty` customizes style for this beamer. This style is special cause:

- Bibliography can be used (see last frame in the code for how to include bib)
- But the slide listing cited papers is muted using `<presentation:0>`
- Navigation toolbar is disabled

Practical Tip

A Philosophy of Less

One of the things that I like with `beamer` is that the “lack of features” gets you actually closer to how a good presentation should be: simple animations, not too much information on each slide...
